

# WAGAMI

## Real passion in Japan

The Wagami paper made artisanally comes from an age-old tradition. It contains a countless number of designs as well as a huge variety of colours. It is in this teeming universe that we found our inspiration.

Some patterns in this collection were taken from original Japanese Wagami papers, some were heavily inspired from them and some others were created. The depth of the blue and the preciousness of gold were the best to use to give credit to these beautiful designs.

The hand pulled serigraphy allows for a fine and precise application in line with the Wagami spirit.

This minimalistic collection allows for numerous interpretations and will seduce modern interior designers. ■
